

Power<sup>®</sup>

# The World's Most Adaptable Shed.<sup>™</sup>

# Our Story.

The idea for Power Sheds was born in 2019 when our founders, Jack Sutcliffe and Simon Hobson, noticed that consumers shopping for a shed often found that quality is hard to discern, particularly online.

Shed brands seem to compete on the same messages - sales and promotions.

At Power Sheds, we want to become the online benchmark for quality and durability by offering a product with unparalleled simplicity through a brand you can trust.

## How we created the perfect shed...

- ✓ Innovative design with a life expectancy of over 25 years
- ✓ Equality and diversity in manufacturing
- ✓ Backed by the European Union
- ✓ Responsible & sustainable purchasing
- ✓ Best of British quality
- ✓ Multiple national award winners
- ✓ Delivery you can trust

# Our Awards.

# Sustainability & Community.

We strive to make the world a better place.

## Our Timber Three Trees Planted For Every One Cut Down.

We have a small, dedicated number of timber suppliers and forests who we work with. These are very carefully selected using a thorough and comprehensive appraisal to ensure they comply with our procurement policy and supply chain documentation.

Our work with our supply chain and the timber suppliers we choose can easily be demonstrated as our suppliers plant three trees for every one cut down.

## Our End pac

Our sheds  
unnecessa  
no box to c  
warp, and  
delivered p

Very few o  
free from p

## Our Packaging and unnecessary packing.

are delivered on a recycled pallet with no  
any packaging. This means for our sheds, there is  
dispose of, no non-biodegradable plastic shrink  
no other plastic covering or protection that the  
product doesn't need!

others can deliver a palletised product over 99%  
packaging.

## Our Footprint Carbon Neutral by 2026.

As a company, we recognise the importance of our  
environmental impact and are actively seeking ways to reduce  
our carbon footprint. With this in mind, we have launched an  
internal Footprint programme to find ways we can reduce our  
carbon footprint and be more environmentally friendly as a  
company.

The main areas that we chose to focus on are; travel,  
consumables and waste.

## Our Community Supporting local people.

We believe we have a huge responsibility to support our  
local community – and we do so in a number of ways. Firstly,  
we ensure diversity and inclusion is at the forefront of any  
recruitment.

By significantly deskillising our manufacturing processes with  
the use of technology, machinery and automation, we have  
been able to eliminate the requirement of skilful / expert labour.

This has reduced barriers to entry for new staff and allowed  
us to employ large numbers of staff from the local area who  
had been struggling to find work. After just 2.5 years of being in  
existence, we had managed to have over 90 members of staff  
employed.

# Power<sup>®</sup> Overlap Apex Shed.

Garden Shed

| ★ Trustpilot

## OVERVIEW

Drawing inspiration from our highly popular shiplap model, the Power Apex, we have designed an overlap version that is both cost-effective and maintains a premium quality. Our overlap version boasts 10mm thick cladding, with a generous 40mm overlap to reduce timber movement and enhance durability, resulting in a product that is built to last.

# What makes Power<sup>®</sup> different?

10

## Power 10 Year Guarantee

Every shed is guaranteed for 10 years against timber rot, decay or insect infestation.

## High Grade Premium Timber

All garden buildings and accessories are made from high quality, responsibly sourced timber.

## Convenient FREE Shipping & Returns

Super fast delivery and you get to choose the delivery day.

## Heavy Duty Framing

Extra thick framing to provide additional strength to the shed.

## Additional Height

That extra bit taller to give you ample headroom inside.

## Toughened Glass

500% more resistant to heat and shock than ordinary glass.

## Galvanised Ironmongery

Ensures the shed lasts longer and minimises oxidation.

## Corner Bracing

Available on shiplap buildings, corner bracing is added to maximise strength.

## High Performance Felt

Special 'polyester' backing ensuring it lasts longer.

## Advanced Preserver

Our special formula wood preserver has a wax additive for additional protection.

## Adaptable Configuration

Modular flexibility - assemble the doors and windows in the configuration you want.

## Roof Tuss Support

Apex sheds come with roof trusses to stop the roof sagging even after years of use.
